

Defense Intelligence Information Enterprise (DI2E)

A "Bridge" between JIE and IC ITE

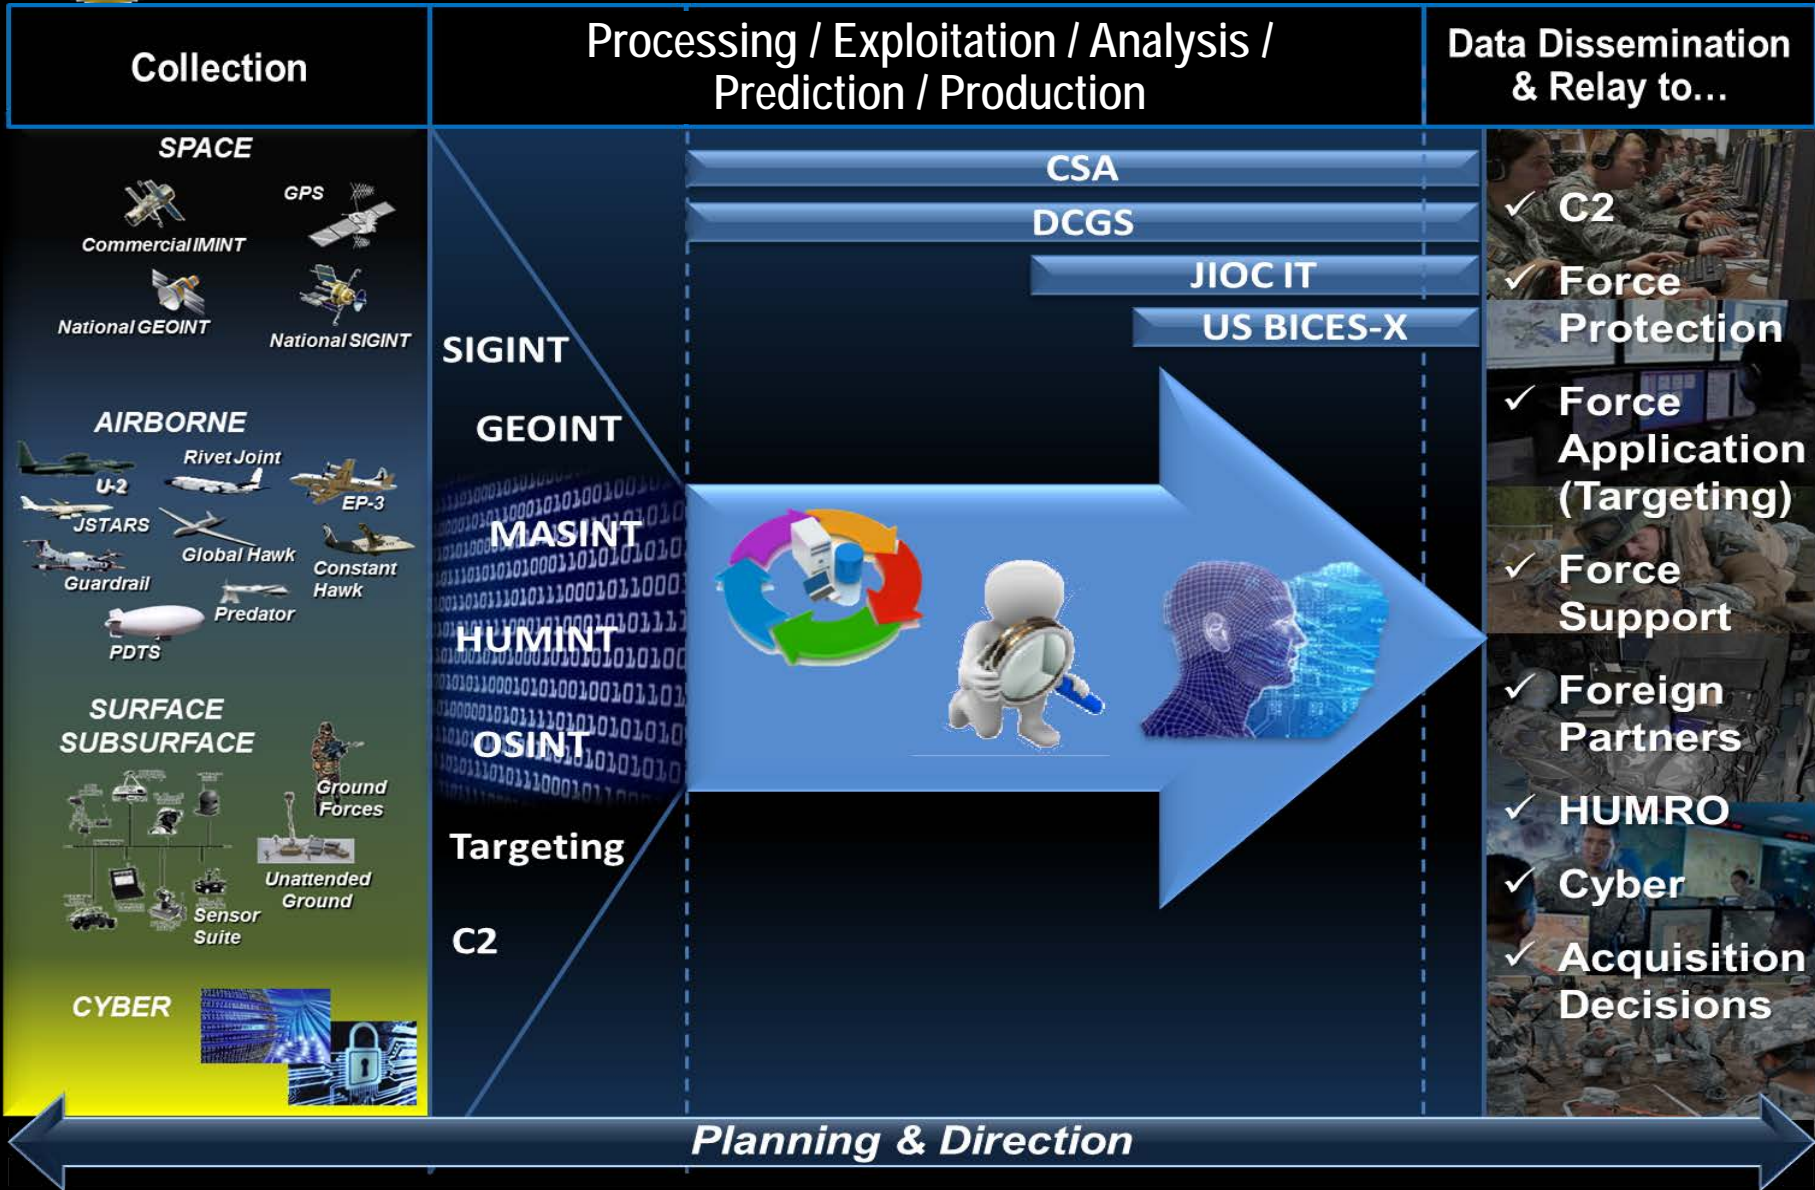

22 May 2014

Office of the Under Secretary of Defense for Intelligence

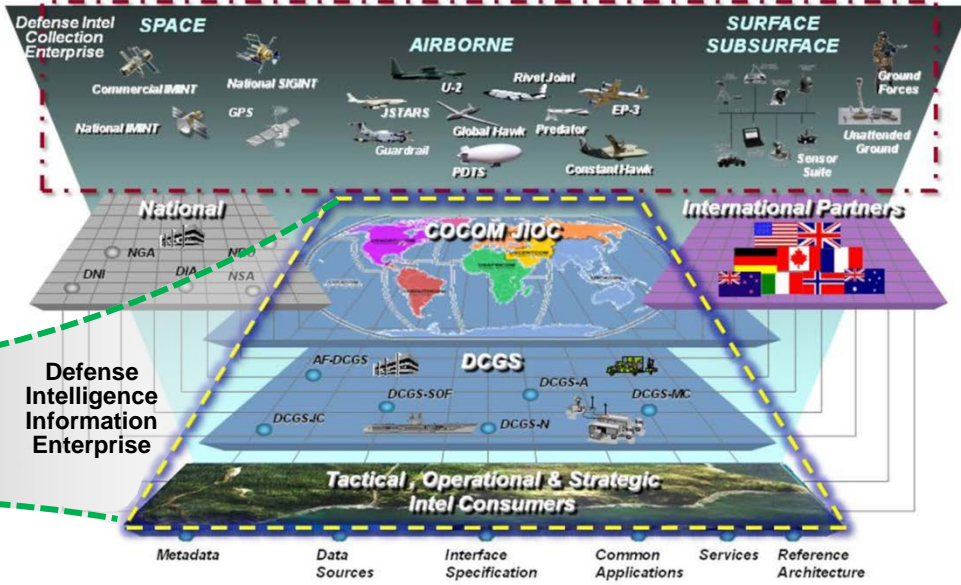

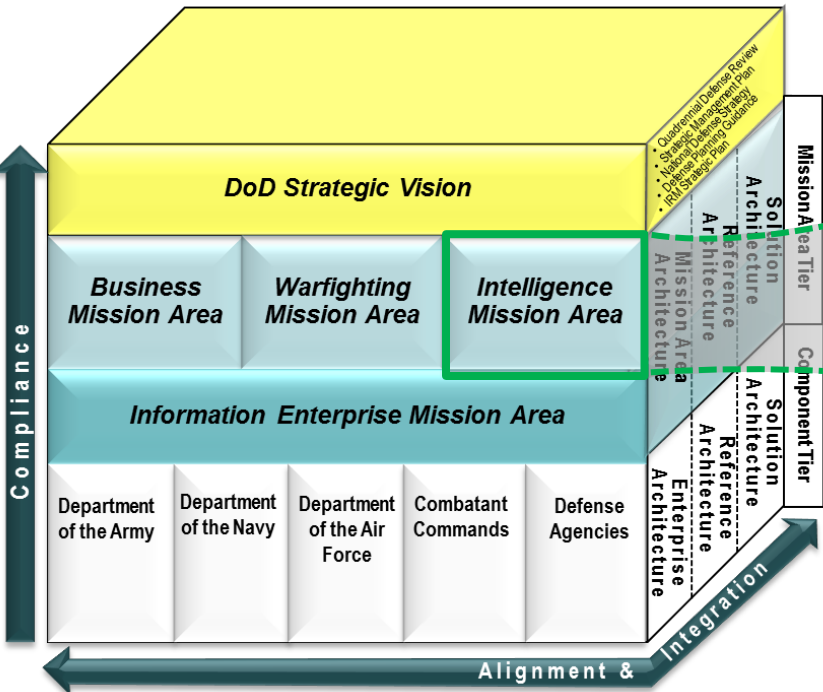

The " Battlespace Awareness " Challenge

Where DI2E fits within the DoD Enterprise

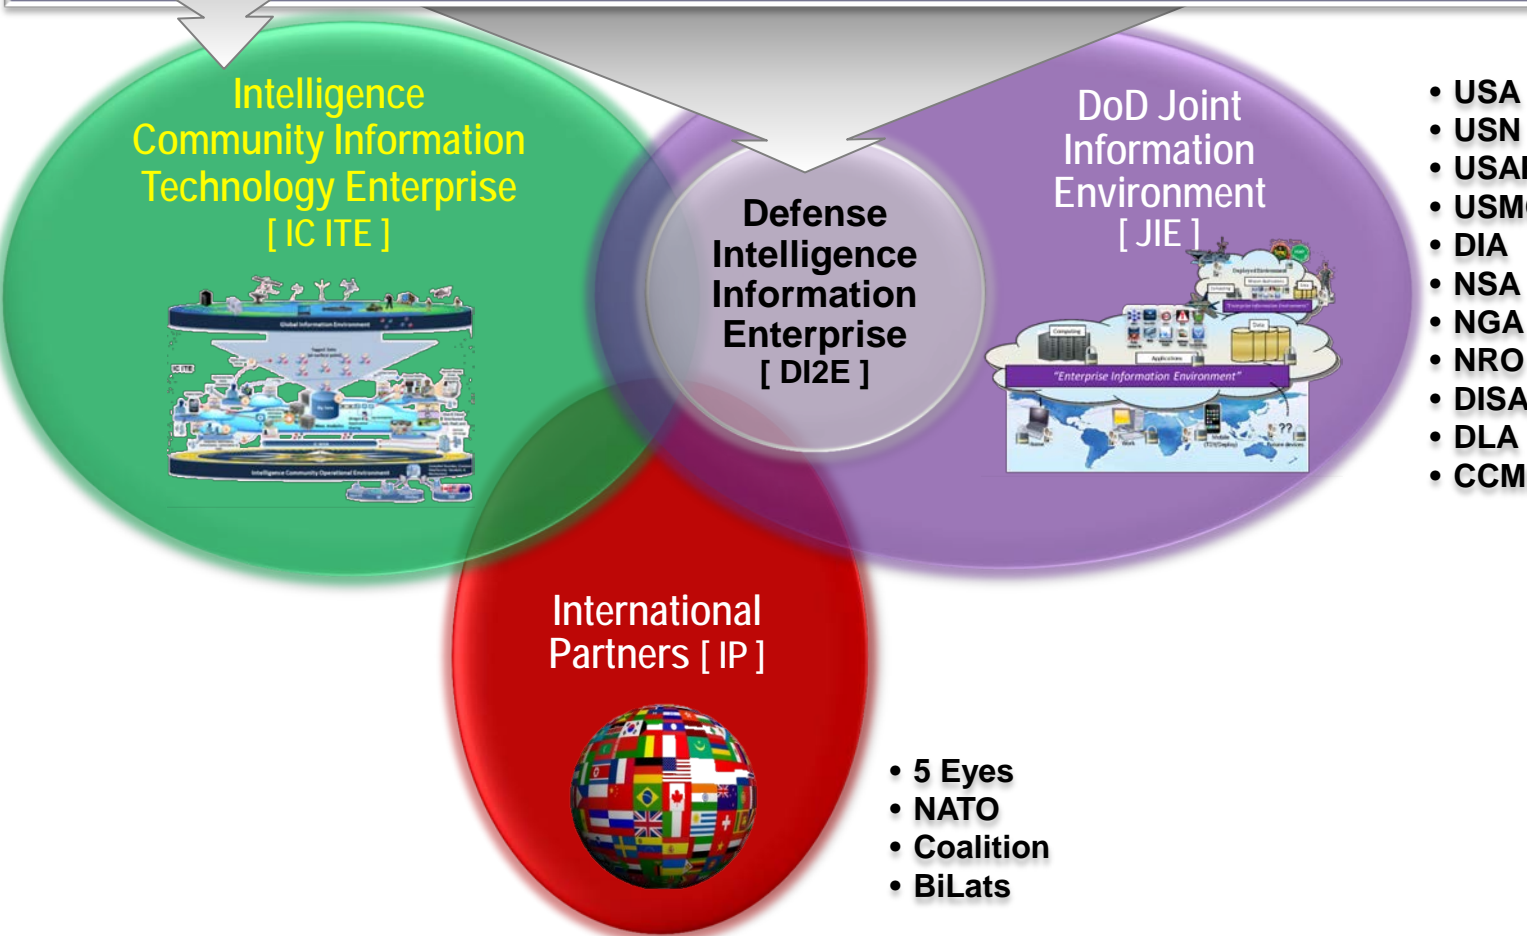

DoD Enterprise Architecture (EA)

DI2E IS THE INTELLIGENCE MISSION AREA ENTERPRISE ARCHITECTURE

DI2E Interrelationships

- DIA
- NSA
- NGA
- NRO
- CIA

- USA
- USN
- USAF
- USMC
- DIA
- NSA
- NGA
- NRO
- DISA
- DLA
- CCMD

- 5 Eyes
- NATO
- Coalition
- BiLats

Myth Buster

DI2E is...	DI2E is NOT...
The unifying construct between the DoD, the IC, and Foreign Partner intelligence information enterprises	In competition with IC ITE or JIE
Defined by the Battlespace Awareness Joint Capability Area	A Program of Record nor a New Architecture
Mission Focused to the Tactical Edge	Always Well Connected

The DI2E Exists Today... a Common Framework Does NOT

The DI2E Framework is...	The DI2E Framework is NOT...
Comprised of software services that enable the DCGS, JIOC & CSA Mission-Based Architectures to operate as a global enterprise	Focused on Implementation [CLOUD etc.] Components & CSAs maintain responsibility for... <ul style="list-style-type: none">• Implementation of the Framework• Title 10/50 & UCP Authorities• Executing Assigned Missions• CONOPS/Doctrine
Comprised of standards, interface specifications and a “test bed” defined by the DI2E community	IT hardware
Focused on making the existing DI2E more Effective & Efficient via a Common Framework	Focused on data center consolidation, collapsing networks or common desktop
Focused on Interoperability Convergence “When & Where it Makes Sense”	Dictating a “One Size Fits All” solution

DI2E Guiding Acquisition Principles

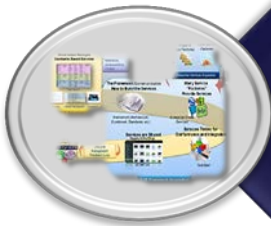

Use a Federated Approach that is Simultaneously Interoperable with JIE, IC ITE and select International Partners

Adopt JIE & IC ITE Services First and Vet Exceptions through the DI2E Council

Conform to a community-defined framework utilizing the DI2E “clearinghouse” established and monitored by the DI2E Council, and funded by USD(I)

Ensure that DI2E framework services are IT platform agnostic
